

FOR IMMEDIATE RELEASE

PIC® Wire & Cable partners with MicroTech Corp. to expand its business activities into Turkey.

[Waukesha, WI, September 29th, 2026] - PIC Wire & Cable, a leading provider of aerospace and defense interconnect solutions, has signed an agreement with MicroTech Corp. to operate as their exclusive distributor and extension of their sales team, enabling strategic growth and furthering PIC's global presence by serving key aerospace and defense customers in Turkey.

About The Partnership

Turkey is a significant aerospace and defense market with a strong domestic manufacturing base and a growing number of influential OEMs and technology organizations. MicroTech's expertise in the Turkish market, combined with their comprehensive technical and after-sales support, will provide exceptional service and the highest level of professionalism through their highly qualified engineering team in that region.

Founded in 2007 and headquartered in Ankara, Turkey, MicroTech Corp. was established to serve military, aerospace, railway and industrial markets. MicroTech represents and distributes world class manufacturers whose cutting-edge products provide solutions to their customers' business needs and continually adds new manufacturers to their portfolio to meet the growing demand. They are dedicated to developing and maintaining strong customer relationships as a cornerstone of their business through securing Design-Win opportunities, fostering strong partnerships with R&D and engineering teams and developing lasting relationships with key procurement decision-makers.

PIC Wire & Cable brings over five decades of experience delivering reliable, premium interconnect solutions for mission critical aerospace and defense applications. The company's portfolio of cables, connectors, assemblies and tailor-made solutions is backed by deep engineering support, rigorous quality systems and responsive customer service, helping OEMs and system integrators de-risk programs, simplify installation and maximize long term application performance.

This partnership will combine PIC's high-performance interconnect solutions and global aerospace growth with MicroTech's regional footprint, certifications and deep relationships at key OEMs. Together, both companies will work to secure and leverage specification positions on critical platforms, while delivering local, engineering-driven support making customers' jobs easier in these regions by meeting demanding technical, quality and delivery requirements.

For additional details, please contact PIC Wire & Cable at 800.742.319, by email at sales@theangeluscorp.com, or visit <https://picwire.com/Contact>. For inquiries on MicroTech, visit <https://microtechcorp.org>, call +1.240.482.8558, or email MicroTech at info@microtechcorp.org.
